EVERY PEDESTRIAN & CYCLIST IS IMPORTANT TO SOMEONE

The SCTPO is committed to bicycle and pedestrian education.

The primary goal of these FREE programs is to improve safety and reduce transportation-related injuries and deaths by educating bicyclists, pedestrians, and motorists on state traffic laws and the safe use of transportation infrastructure.

BIKE RODEOS
One day safety clinics that are designed to teach children safety skills and the rules of the road. Stopping, vehicle scanning, and hazard avoidance, are just some of the skills taught to attendees. The one day event provides young cyclists with basic skills and information to keep them safe as they ride.

HELMET FIT
A crucial element of the helmet program is educating parents and children about the importance of proper helmet fit. Our staff and certified teachers ensure that every helmet that is given to a child, fits properly.
